EXPERIENCE

Jaris, Burlingame, CA

Senior Frontend Engineer, Nov 2024 - Jan 2026

- Collaborated on the launch of Onboarding as a Service and development of **Managed Settlements**, a BaaS infrastructure for settling merchant transactions, collecting fees, and simplifying payouts.
- Assisted with frontend re-architecture for Flex Loan and Instant Payout products, migrating from client-side to server-side rendering and transitioning the codebase to a scalable monorepo.
- Leveraged AI-driven workflows with Claude Code to accelerate frontend migrations, developing specialized Claude skills and slash commands to automate repetitive refactoring while utilizing parallel agent execution to speed up development, ramp up test coverage, and harden security/compliance standards.

Parafin, San Francisco, CA

Product Engineer, Aug 2021 - Aug 2024

- Engineered and maintained mission-critical components across merchant-facing **capital products**, partner-facing **platform**, and the **corporate website**.
- Strengthened product stability and user experience by migrating core infrastructure to Next.js and optimizing Auth0 integration for better security and performance.
- Standardized frontend design system and UI component library with Storybook, and implemented comprehensive end-to-end testing with Playwright.
- Partnered cross-functionally with product managers and designers to translate complex requirements into functional features, effectively bridging the gap between design intent and technical feasibility.

DXC Technology, New Orleans, LA

Full-Stack Developer, Jul 2019 - Jul 2021

- Modernized the application used by American Airlines reservation agents by breaking down a monolithic legacy Java application into Spring Boot REST APIs and embeddable web interfaces.

University of New Orleans, New Orleans, LA

Student Worker (Part-Time), Jun 2016 - May 2019

- **Web Developer, Bioinformatics and Machine Learning Lab:** Developed the **lab's portfolio** site and a cloud-hosted **platform**, enabling researchers to access the lab's bioinformatics algorithms online.
- **Undergraduate Researcher, Narrative Intelligence Lab:** Developed a simple mobile game for data-driven assessment of mathematical reasoning in middle school children.
- **Student Mentor, Computer Science Department:** Mentored students on assignments and technical projects across introductory programming classes and developer tools such as git.

EDUCATION

University of New Orleans, New Orleans, LA, **B.S. in Computer Science**, May 2019

SKILLS

TypeScript • React • Storybook • Playwright • Next.js • React Router • Nx • Turborepo • Claude Code • Figma • Webflow • Node.js • PostgreSQL • Scala • Java • Spring Boot • Vue.js • Express • MongoDB • Jekyll • Markdown • Git • GitHub Actions • Docker • AWS • S3 • Bash • Auth0 • Clerk • Nginx • Linux • Rust • WebGL/WebGPU • WebAssembly (Rust) • HTML/CSS/JavaScript • Raspberry Pi • Arduino/Teensy

AWARDS

Winner, IEEE Region 5 Robotics Competition, Apr 2017

Developed an autonomous robot capable of navigating a simulated cave system

CSCI Achievement Award, University of New Orleans, 2017

Recognized for stellar academic performance within the Computer Science department

National Model United Nations New York, Mar 2016

Received Distinguished Delegation and Outstanding Position Paper awards
